

Plasma Bio-Resonance (RIFE) Therapy

In the 1920's, Dr. Royal Rife invented a microscope through which he could view living microorganisms. He observed their life patterns and discovered that, among other things, some of these agents could induce cancer. He also found that these same organisms, under certain environmental conditions, were harmless. This clearly demonstrated that [cancer](#) could be reversed. His next invention was an instrument that could produce specific frequencies emitted through a plasma tube. When organisms were exposed to the proper frequency, they were destroyed, much like a musical note breaking a glass. Dr. Rife discovered the resonant frequencies for over 50 infectious organisms. When this treatment was applied to animals, he was able to produce rapid cures in cancer and infectious illnesses.

In 1934, in conjunction with Milbank Johnson, M.D. and other physicians from the University of Southern California Medical School, Dr. Rife conducted a study on 16 terminal cancer patients. All 16 were cured, and certified by the University's pathologist. Within a short time, Dr. Rife and everyone associated with him came under attack by the medical profession, and his discoveries were ignored and belittled. Recently, his work has been re-discovered and is available for use. It is helpful for a wide range of problems, and has been used for muscle and joint aches (fibromyalgia, arthritis, etc.), [cancer](#), all infectious conditions (bacterial, viral, fungal and parasitic), high blood pressure, [stroke](#), nervous system disorders, headache, skin problems, and some psychological disorders. It can be potentially used for almost any condition, as long as the proper frequency is known, much like homeopathy. The treatment is simple, as one simply sits near the device while it is operating, similar to getting an x-ray taken. Given the proper frequency, no damage is done to normal tissue. Likewise, if a frequency is used which is not appropriate for one's condition, there is no effect.

This therapy is not approved by the FDA, and is provided at your request. Side effects are not completely known, although there have been few recorded over thousands of patient hours of exposure. For more detailed information, you can go to [www. Rife. Org](#), or get the book *The Cancer Cure That Worked* by Lynes.
